**Skills:** Microsoft Office Suite (Word, Excel) | HTML | CSS | C | C++ | Python

**Interests:** Game Development, Software Development, Web Development

## **(FOR JOB SECTION)**

- This section regarding experiences has bulleted accomplishments, which provide examples of when you successfully used the skills employers are seeking. Make sure you have between 2 and 5 bullet points in each section.
- Your bullet points should start with a strong action verb, which then follows with an explanation of what you were doing, describe how you did it, and most importantly if applicable, any achievements. Statements should convey your strengths/proficiencies in one or more skills that intrigue the employer by showing examples of when you have used them.
- When writing about your experience, consider these questions: What was the result/outcome of your work? What were your accomplishments? How did you impact the organization? What skills/knowledge did you grow? How does this experience relate to your internship/employment goal?
